# WHAT IS ULTRAVIOLET TOKEN?

---

- A community-focused, community-driven project that gives back to its favorite charity... the UltraViolet Community!
- A decentralized finance (DeFi) token that lives on the Binance Smart Chain (BSC) BEP-20 network.
- A project with a forward-thinking vision to evolve from a investor-driven, community token to a community-owned ecosystem of applications that add benefit and value to the crypto industry.
- An up and coming ecosystem that is owned by an honest team of individuals who are tired and frustrated of scams. As investors with the desire to build towards retirement and establish confidence in the crypto industry, you need legitimate projects. We are here to demonstrate that investing in cryptocurrency can be rewarding and promising. Allow us to earn your trust.

# WHY INVEST IN ULTRAVIOLET?

---

- Investors with a share of UltraViolet tokens have a stake in how this ecosystem evolves. The ceiling is high.
- Holders are rewarded for their loyalty in 3 ways:
  - Passive income. 2% of every transaction will be redistributed in proportion to the amount held in each wallet.
  - Liquidity Pool acquisition. 5% of every transaction will be allocated to the LP, resulting in a steady price floor increase.
  - A chance at winning the Ultraviolet Lottery. 1% of every transaction is sent to a wallet that will serve as our jackpot. Depending on the transaction frequency, this could result in a lot of money given away to our community.
- Our project is built on a framework that has potential to mature into something unique and special. Investors who get in at the infancy stage are positioned for a large return on investment.
- As previously mentioned, this project is NOT an Exit scam.

# OUR GOAL

---

## **End Game**

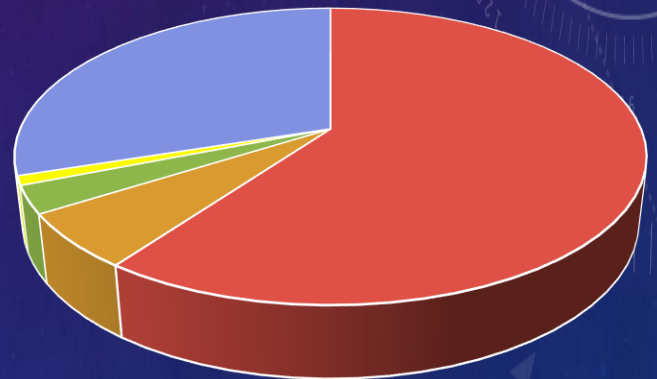

- Become a top 100 cryptocurrency ecosystem with a portfolio of assets that provide a tangible value to our token.
- We can accomplish this dream with a phased approach comprised of 4 key milestones:
  - Develop and establish the initial launch ecosystem. Create the token, create and begin utilising the Ultraviolet social media platforms, and successfully launch the token contract on a decentralised exchange.
  - Aggressively build and grow a large, sustaining Ultraviolet community. Adhere to ethics and principles that investors will gravitate towards. Recruit through marketing and social media outlets.
  - Establish a community-driven platform that will serve as a voting medium. This capability will help shape the path and future of Ultraviolet as the Holders of the token decide the next phase of our operation.
  - Finally, act on what our community decides by allocating the correct resources and delivering the necessary solutions.
